Western Australia Forecast

Issued at 4:45 am WST on Saturday 18 May 2024
for the period until midnight WST Tuesday 21 May 2024.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation - Northern Western Australia

A strengthening high pressure ridge to the south is bringing a return of moderate to fresh and gusty winds to northern parts.

Weather Situation - Southern and Central Western Australia

A strengthening high pressure system in the Bight and associated ridge will dominate the weather pattern over the weekend and into early next week. A weakening cold front may brush the South West Capes on Tuesday.

Forecast for the rest of Saturday 18 May

Mostly sunny throughout. Windy over most parts of the State, apart from the far southeast.

Forecast for Sunday 19 May

Mostly sunny throughout. Windy over most parts of the State, apart from the far southeast.

Forecast for Monday 20 May

Mostly sunny day. Chance of light shower about the SW Capes in the evening. Windy over the north and west of the State.

Forecast for Tuesday 21 May

Chance of light shower about the SW Capes, otherwise mostly sunny over the remainder of the State. Windy over northern parts of the State, mostly morning.

The next routine forecast will be issued at 4:30 pm WST Saturday.

* Calls to 1300 numbers cost around 27.5c incl. GST, higher from mobiles or public phones.
