## Western Australia Forecast

Issued at 4:45 am WST on Sunday 10 December 2023  
for the period until midnight WST Wednesday 13 December 2023.

### Warning Information

For latest warnings go to [www.bom.gov.au](http://www.bom.gov.au), subscribe to RSS feeds, call 1300 659 210\* or listen for warnings on relevant TV and radio broadcasts.

### Weather Situation - Northern Western Australia

A broad trough lies over northern WA. The trough will be forced offshore from the Pilbara coast by Sunday as a strong high pressure system moves south of the State and extends a ridge through nearly the entire State. By Monday, the trough will contract to the north Kimberley coast as the southeasterly surge extends over southern and central Kimberley. The ridge will weaken from Tuesday, allowing the trough to move back over land later in the week.

### Weather Situation - Southern and Central Western Australia

A trough over the central Interior will continue contracting away to the northeast as a strong high pressure ridge develops over the region. The high will move south of the State by Sunday and its associated ridge will extend through all of southern and central WA, bringing fresh and gusty southeasterly winds to most areas this weekend. The ridge will begin to gradually weaken from Monday as a low pressure systems arrives near the Eucla coast from the east. A trough is also developing down the west coast and will move offshore by Monday, before moving back inland midweek.

### Forecast for the rest of Sunday 10 December

Showers over southeastern parts of Eucla and far eastern parts of the South Interior. Showers and gusty thunderstorms over the Kimberley and adjacent North Interior. Chance of an early gusty thunderstorm about the Pilbara coast. Windy in the Pilbara, southern Kimberley, Gascoyne, Interior, Goldfields, Eucla, Central West and across the Darling Scarp.

### Forecast for Monday 11 December

Showers and gusty thunderstorms over the north and east Kimberley. Showers over the Eucla, adjacent South Interior, eastern parts of the South East Coastal and adjacent Goldfields. Windy in the morning through the Pilbara, southern and western Kimberley, northern Interior, Gascoyne and Central West.

### Forecast for Tuesday 12 December

Showers in the Eucla and adjacent South Interior. Light showers possible in the South East Coastal District and adjacent Goldfields. Showers and thunderstorms limited to northern parts of the Kimberley.

### Forecast for Wednesday 13 December

Chance of a shower or thunderstorm over northeast Kimberley. Chance of a light shower about the south coast. Very hot over the Kimberley.

The next routine forecast will be issued at 4:30 pm WST Sunday.
